Re: Agate Lake

Dear Members,

We will be having Agate Lake treated in the next couple of weeks.

The treatment of Agate Lake was adopted into our Capital Improvement Fund in 2011 and is still important to maintain.

The lake will be treated with an early season herbicide that controls submerged plant growth for the summer.

This treatment is completely safe for humans and all wildlife.

We will also be having a fountain installed in the next month. This will help with the aeration of the lake.

For both the treatment of the lake and the purchase of the fountain the cost will be approximately \$4500.00

Thank You

Sincerely,

Sandy Point Board of Directors
