Dear Sandy Point Community Members,

We know that the developments related to COVID-19 continue to cause uncertainty and challenges for many, and we wanted to personally reach out to keep you updated on how we're responding. Our principal priorities are the health and safety of our staff and continuing to serve the needs of our community.

Our staff is working every day. We are in the office, but we are not allowing anyone in the office.

If you need any assistance, please call the office first to talk to one of the staff. The staff will direct your call to the appropriate person for water or community related questions.

In addition, in order to continue serving the needs of our members and water department advisors, we have systems in place for our consultants to continue to work with us virtually.

Our team will continue to monitor the situation, and to follow recommendations from the World Health Organization (WHO), U.S. Centers for Disease Control and Prevention (CDC), and local authorities such as Whatcom County, State of Washington and Federal Government.

This is an unprecedented time for all of us. We appreciate your confidence in SPIC's ability to serve you, while also taking measures to safeguard against the spread of coronavirus.

The community facilities will not be available for rental or use by anyone until further notice.

In addition, the Marina will be closed, this includes the fuel dock. If you have a fob you will still have access to the launch ramp and your boat.

Please, feel free to reach out to us with any questions.

Respectfully,

Pat Malara, President

Sandy Point Improvement Company
